TwinMAX-35 Plus	16"			X	\$ 449.95
PremiumPRO-35	16"			X	\$ 709.95

Use these definitions to find the RIGHT chain for the material you are cutting.

TwinMAX- A good general purpose chain that will handle 80% of cutting jobs, this diamond chain is designed to be affordable and user friendly.

TwinMAX Abrasive - A special diamond concentration and harder bond make this diamond chain perfect for cutting through highly abrasive aggregate like brick and sandstone.

TwinMAX Plus - Built to tackle harder materials and more steel, TwinMAX Plus is a long-lasting general purpose diamond chain.

AbrasivePRO - A special segment recipe and single bumper design allows these chains to slice through brick, sandstone and other abrasive materials.

CornerPRO - Featuring a narrow kerf, this chain was developed for a single purpose: FINISHING CORNERS ONLY. Important - CornerPRO has a unique configuration that restricts its application to FINISHING CORNERS ONLY and should only be used by trained professional cutters.

PremiumPRO - Designed specifically for applications involving hard aggregate or heavy steel, this chain offers longer life and the best value.

ProFORCE Abrasive - A heavy duty diamond chain built to perform in the harshest cutting environments.

ProFORCE Premium - Designed for longer life in hard aggregate, this will be the professional cutters choice when faced with the most demanding jobs.

SpeedPRO - A unique sandwich designed segment combines fast cutting in professional applications involving heavy steel.

TwinPRO - A great general purpose chain that offers the same easy installation as the TwinMAX series, but upgraded for professional cutting.

Diamond Chains & Guide Bars for ICS Hydraulic Concrete Chainsaws

 <p>*USER ALERT - Bumper goes on the leading edge</p> <p>- Correct alignment prevents chain breakage! - Bumpers protect diamond segment from "catching" on sharp edges. - Incorrect chain alignment is the #1 cause of chain breaking!</p>	Required Guide Bar Size	814PRO	853PRO	880F4	<p>\$\$</p> <p>Price</p>
