Power Grit Benefits

Power Grit Utility Chain is an exciting new cutting product designed to change the way the job gets done. From ductile Iron to plastic pipe, Power Grit will get you in and out of the job faster - easier - and safer than other methods.

Change the way Underground Pipe Cutting Jobs Get Done!

\$575.00

Pipe Clamp Accessory

In addition to the time saving value of Power Grit technology, the pipe clamp accessory developed for the underground pipe application brings a whole new level of safety, accuracy and ease of use to the job.

The **PowerGrit pipe clamp** was developed to take the weight of the saw from the operator, make the saw more stable and produce straighter, more accurate cuts. The clamp works on pipe from 4" to 12" in diameter depending on which saw and guide bar are used. While cutting with the clamp has distinct benefits, PowerGrit can be used “free hand” or with the pipe clamp.

PowerGrit Chain is Easier and Safer than other methods:

- Reduced excavation time to access pipe
- Reduced labor required to dig under pipe
- Single position cutting access up to 12" diameter pipe - no need to access bottom of pipe
- Easier saw control, reduced operator effort during cutting
- Improved operator safety due to access, control and reduced rotational forces
- Reduced potential for blade breakage
